# Special Selections and New Items for 1952

**BEANS, Contender.** (New). Plants vigorous and mosaic resistant. Pods oval shape, stringless, slightly curved, 6 to 7 inches long. Yield excellent. See next page.

**BROCCOLI, De Cicco.** A fine strain for early market purposes. Heads large and uniform; color bluish green. Listed on page 5.

**CABBAGE, Bonanza.** This recent development in Cabbage is unusual. Ball-shaped heads are hard right from the start, ready for early cutting. If desired they can be left in the field and grow larger without much splitting or turning white. See page 6.

**CABBAGE, Wisconsin Copenhagen.** Highly resistant to "Yellows". Plants compact; heads round and solid, medium size. Listed on page 6.

**CAULIFLOWER, Snowball M.** Resembling our White Mountain in size and shape, but matures a week later. So uniform that nearly all heads mature at one time. Refer to page 7.

**CAULIFLOWER, Snowball Y.** The largest of the Snowball type. Inner leaves fold over the head for self-protection. Excellent for late crop. See page 7.

**CELERY CABBAGE, Michili.** A vigorous grower and sure header. Slender, long heads and very solid. Listed on page 8.

**CELERY, Utah Pascal.** Largest of the Pascal sorts. Grows tall and erect. Dark green, long jointed with a full golden heart. See page 9.

**CELERY, Emerson Pascal.** Decidedly different in foliage, resembling Fern leaves. Stems long jointed, rounded and brittle; flavor supreme. Listed on page 9.

**SWEET CORN, Golden Security.** This fine hybrid outyields all others in tonnage per acre. Two large, golden ears on one stalk are common. See page 10.

**CUCUMBER, Burpee Hybrid.** Fruits are 8 inches long and  $2\frac{1}{4}$  inches in diameter with blunt ends. Disease and heat resistant for late summer crop. Can be picked every few days. Listed on page 11.

**LEAF LETTUCE, Slobolt.** Recommended for mid-summer use. As the name implies it stands longer before bolting to seed. Refer to page 13.

**HEAD LETTUCE, Great Lakes.** Our strain produces more marketable heads than any other we have seen. Will stand long distance shipping. See page 13.

**MUSKMELON, Golden Delight.** Fruits are round, slightly ribbed, with golden tint under netting. Flesh orange and very sweet. Refer to page 14.

**ONION, White Bunch.** The true French strain is the best for growing mild, tender bunch Onions. Our stock is supreme. Refer to page 15.

# CAULIFLOWER

In judging Cauliflower we use the following standards as being essential: Short, strong stem; broad outer leaves; inner leaves folded well over the heart for self protection; good weight and depth of head at maturity; resistance to "riciness" and "fuzziness"; absence of small green leaves coming through the head. All these fine points are bred into the seed and that's why so many growers prefer our stocks.
